## **MAGNA - (Rugged & Strong)**

- Magna Maintains the track record of zero fault or service call from clients since its introduction in the year 2012.
- Magna sport a extra large, double-row spherical roller bearings below gearbox with Flexible or re-silent coupling for isolating the gearbox from mis-alignment, shock load, bending moment
- Enhanced gearbox life
- Mechanical seal for shaft sealing for high pressure reactors
- Best for combined axial and radial load conditions
- Ideal for least/No shaft run-out conditions
- More than 200 successful installations in Fertiliser, Polymer, pharma, Adhesive and Starch plants
- Maintenance free
